Supplementary figure S3: change in standardized mean difference of variables included in the propensity score before and after weighting

- **Standardized mean difference before propensity score weighting**
- **Standardized mean difference after propensity score weighting**

**Variables**:
- Age
- Delay between diagnosis and introduction of the 1st TNFi
- Sex (men)
- History of inflammatory bowel disease
- History of uveitis before introduction of TNFi
- Diagnosis (SpA or PsA)

**Abbreviations**:
- TNFi: TNF alpha inhibitor treatment
- SpA: spondyloarthritis
- PsA: psoriatic arthritis
