S3: Age-related cell frequency.

Frequencies of myeloid Dendritic Cells (mDC; CD14\(^-\)HLADR\(^+\)CD11c\(^+\)) and plasmacytiod Dendritic Cells (pDC; pDCs; CD14\(^-\)HLADR\(^+\)CD123\(^+\)) in age groups of study subjects indicated a slightly higher presence of mDCs early in life, but a steady level during childhood.
