Supplementary Figure 7

**Assays used before bisul fate conversion**

- **Chr3** (cfDNA quantification assay)
- **CF** (cfDNA quantification assay - not affected by bisulfite treatment)
- **PBC** (Peripheral blood leukocyte contamination control assay)
- **CPP1** (plasma purification efficiency control assay)

**Assays used after bisulfite conversion**

- **C9orf50** (DNA methylation marker assay)
- **KCNQ5** (DNA methylation marker assay)
- **CLIP4** (DNA methylation marker assay)
- **CF** (cfDNA quantification assay - not affected by bisulfite treatment)

**Test results**

- **CRC patients**
- **Healthy controls**
- **Positive control**
- **No template control**

**Supplementary Table 1**
