CONSORT 2010 Flow Diagram for the paper:

*Infusion related thrombogenesis by liver derived mesenchymal stem cells controlled by anticoagulant drugs in 11 patients with liver based metabolic disorders.*

**Enrollment**

- Assessed for eligibility (n=20)
  - Excluded (n=0)
    - meeting inclusion criteria (n=0)
    - Declined to participate (n=0)

**Allocation**

- Randomized (n=20)
  - Cell dose 12.5x10^6 cells/kg (n=4)
    - Received allocated cell dose (n=4)
    - Did not receive allocated cell dose (n=0)
  - Cell dose 50x10^6 cells/kg (n=6)
    - Received allocated cell dose (n=5)
    - Did not receive allocated cell dose (due to adverse events (n=1))
  - Cell dose 200x10^6 cells/kg (n=10)
    - Received allocated cell dose (n=5)
    - Did not receive allocated cell dose (due to adverse events (n=2), catheter issues (n=3))

**Coagulation Analysis**

- Analysed (n=4)
  - Excluded from analysis (missing coagulation data) (n=2)
- Analysed (n=2)
  - Excluded from analysis (missing coagulation data) (n=4)
- Analysed (n=5)
  - Excluded from analysis (missing coagulation data) (n=5)
