Human primary myoblasts in proliferation

**Control primary myoblasts**

- nc-siRNA
- DUX4-siRNA
- DUX4c-siRNA

**FSHD primary myoblasts**

- nc-siRNA
- DUX4-siRNA
- DUX4c-siRNA

The graphs show the number of mitosis per field for different siRNA treatments in control and FSHD primary myoblasts. The bars indicate the mean mitosis count with error bars representing the standard deviation. The asterisks denote statistical significance: *** indicates a significant difference compared to the control group.
