Online Resource 3: Comparison of [11C]choline SUV and TBR in low-grade gliomas

A)

![Box plot comparing SUV in Normal and Tumour samples. The box plot shows that the SUV values are not significantly different between Normal and Tumour samples.](image-url)
The graph shows a comparison of TBR (Tumor-to-Blood Ratio) values between Normal and Tumour samples. The TBR values for Normal samples are not significant compared to Tumour samples.
B)

SUV 10–40 min AUC: 0.77

TBR 10–40 min AUC: 0.61
