Supplemental S6: MTT assays were performed to determine the sensitivity of (a) MiaPaCa2 and MiaPaCa/Erlo, and (b) AsPC1 and AsPC/Erlo cells to metabolic inhibitors to pentose phosphate pathway (6AN), oxidative phosphorylation (Rotenone) and glycolysis (Iodoacetic acid). Data presented as average ± SEM (n=3) (*, p < 0.05, #, p < 0.01).
