Overview of In-Session and Post-Session Evaluation Elements

Each Module will be evaluated during the pilot phase using the following elements:

**In-Session Evaluation**
- Facilitator assessment during activities and discussions
- Fast Feedback Form; participant reflections and comments
  - Kirkpatrick Level 2
  - Kirkpatrick Level 1
  - Standard feedback tool

**Post-Session Evaluation**
- Post-Workshop Survey (week immediately post-workshop)
  - Kirkpatrick Level 1
- Online survey tool
- Follow-up Survey (6 months post-workshop)
  - Kirkpatrick Level 3
  - Online survey tool
- Facilitator Feedback Survey (after pilot testing period)
  - Kirkpatrick Level 2
  - Online survey tool
- Outcome indicators (longer term measures)
  - Kirkpatrick Level 4

- Modules 1 and 3 only
- Out of scope for pilot

**Kirkpatrick Levels**

**Level 1: REACTION**
How did learners feel about the learning?

**Level 2: LEARNING**
Did they learn what we intended?

**Level 3: BEHAVIOUR**
Has what they learned changed their actions?

**Level 4: RESULTS**
Has the learning changed outcomes?
# Module 1: Patient-Oriented Research

## Key Evaluation Elements

<table>
<thead>

</table>

- Participants to identify future learning needs

**Follow Up Survey**
- Participants to identify ongoing learning needs
  - I have identified the following learning needs:

**Evaluation Tools**

**Fast Feedback Form [paper-copy only]**
Distribute this form at the end of the Module 1 session and collect before participants leave.

**Fast Feedback!**
Please take a few moments to provide some quick feedback on today’s session.

**In the session today, what perspective were you bringing?** (circle one)

Patient – Researcher – Health care professional – Health system policy/decision-maker – Other

1. How did we do in meeting today’s learning objectives? Please select one response for each objective.

   After today’s session:

   I understand the history of patient-oriented research.
   
   Strongly Agree – Agree – Disagree – Strongly Disagree

   I can describe how POR is different from traditional health research.
   
   Strongly Agree – Agree – Disagree – Strongly Disagree

   I understand the role of patients in POR and the levels of engagement.
   
   Strongly Agree – Agree – Disagree – Strongly Disagree

   I appreciate the value of personal stories and how they contribute to better understanding.
   
   Strongly Agree – Agree – Disagree – Strongly Disagree

2. What did you find most valuable or helpful about this session?
3. How could this session be improved?

Thank you for your feedback!

Please watch your email – we will also be sending out an online survey to gather additional reflections and comments on today’s session.
Post-Workshop Survey
The recommended timeframe for participants to complete this survey is one week after the workshop.

Thank you for participating in the Module 1: Patient-Oriented Research session last week. As part of our ongoing improvement efforts, we would appreciate if you could take a few moments to provide some feedback on the session. Your responses are anonymous and will be used only for the purpose of session improvements.

When you participated in the session, what perspective were you bringinig? (circle one)

- Patient
- Researcher
- Health care professional
- Health system policy/decision-maker
- Other

Workshop Sections
1. During the workshop, we covered several sections of content. Please rate each of the workshop sections.

Shared meaning and common language. Included defining terms such as: patient, engagement, patient-oriented research, and patient-reported outcome measures.

- Excellent
- Good
- Adequate
- Poor
- Very Poor

History and context. Included history of patient engagement, principles of patient and family centred care, patient engagement success stories, partnership with Canadian health research, and Strategy for Patient-Oriented Research (SPOR).

- Excellent
- Good
- Adequate
- Poor
- Very Poor

Roles of patients in POR and spectrum of engagement. Included the research cycle, levels of participation, spectrum of engagement and patient engagement in research.

- Excellent
- Good
- Adequate
- Poor
- Very Poor

How it works. Included practical considerations for patient engagement.

- Excellent
- Good
- Adequate
- Poor
- Very Poor

Workshop Format and Delivery
2. Please rate your agreement with the following statements.

The workshop materials were well-prepared.

- Strongly Agree
- Agree
- Disagree
- Strongly Disagree

The pace of the workshop was appropriate.

- Strongly Agree
- Agree
- Disagree
- Strongly Disagree

The workshop activities were valuable.

- Strongly Agree
- Agree
- Disagree
- Strongly Disagree

The workshop facilitation was effective.

- Strongly Agree
- Agree
- Disagree
- Strongly Disagree

3. This module is Module 1 in a series. Please indicate which modules you have completed and in which order.
4. This module was delivered as an in-person workshop. Would you have preferred to learn this content in a different way?

   Yes or No

   If yes, what other method(s) would you have preferred? (for example, by webinar, online module, etc.)

5. What will you remember most about the session?

6. What improvements would you suggest?

Patient Engagement in Research
7. For patients: During the session we talked about the different roles for patients in research. When you think about getting involved, which roles most interest you? (Check all that apply).

   Governance  Priority Setting  Peer Review
   Other Committee Work  Research  Other (please describe)

   For researchers: During the session we talked about the different roles for patients in research. When you think about patient involvement in your research, which roles are you currently or are likely to engage them in? (Check all that apply).

   Governance  Priority Setting  Peer Review
   Other Committee Work  Research  Other (please describe)

8. What other learning needs do you have related to patient-oriented research?

9. What goals do you have for your engagement in patient-oriented research?

Other Feedback
10. Please share any other comments you have about the workshop.

Thank you for your feedback!
Follow-Up Survey
The recommended timeframe for participants to complete this survey is six months after the workshop.

In the past six months, you participated in the Module 1: Patient-Oriented Research session. One of the goals of the workshop is to build capacity for engaging patients in research. Please take a few moments to provide feedback on your participation in patient-oriented research to date.

When you participated in the session, what perspective were you bringing? (circle one)

Patient – Researcher – Health care professional – Health system policy/decision-maker – Other

Engagement in Patient-Oriented Research (POR)
1. For patients: After the workshop, you were asked how you wanted to be engaged in POR. In the past six months, have you had an opportunity to be engaged in POR?

Yes or No

If yes, how have you been engaged in POR? (Check all that apply.)
Governance  Priority Setting  Peer Review
Other Committee Work  Research  Other (please describe)

If no, what are some of the reasons why you have not been engaged in POR?
_____________________________________________________________________
_____________________________________________________________________

For researchers: After the workshop, you were asked how you might engage patients in your research projects. In the past six months, have you had an opportunity to engage patients in POR?

Yes or No

If yes, how have these patients been engaged in POR? (Check all that apply.)
Governance  Priority Setting  Peer Review
Other Committee Work  Research  Other (please describe)

If no, what are some of the reasons why you have not engaged patients in POR?
_____________________________________________________________________
_____________________________________________________________________

Guiding Principles
2. For patients: During the workshop, we looked at guiding principles of patient engagement. In thinking of your experiences in health research during the last six months, please select the most appropriate response for the following statements.

I believe that the research is inclusive and includes a diversity of patients’ perspectives.

Always - Usually - Sometimes - Rarely - Never

I feel that I have had adequate support and flexibility.
Always - Usually - Sometimes - Rarely - Never

On the teams that I’ve worked with, I feel that there is mutual respect.

Always - Usually - Sometimes - Rarely - Never

I feel that I have had the opportunity to co-build by working in partnership from the beginning.

Always - Usually - Sometimes - Rarely - Never

For researchers: During the workshop, we looked at guiding principles of patient engagement. In thinking of your experiences in health research during the last six months, please select the most appropriate response for the following statements.

I believe that the research is inclusive and includes a diversity of patients’ perspectives.

Always - Usually - Sometimes - Rarely - Never

I feel that patients have had adequate support and flexibility.

Always - Usually - Sometimes - Rarely - Never

On the teams that I’ve worked with, I feel that there is mutual respect.

Always - Usually - Sometimes - Rarely - Never

In our projects we have had the opportunity to co-build by working in partnership from the beginning.

Always - Usually - Sometimes - Rarely - Never

3. Is there anything you would like to share about your experiences and the guiding principles?

_____________________________________________________________________

_____________________________________________________________________

Sharing Stories

4. For patients: In the workshop, we talked about the importance of sharing stories. In the past six months, have you had an opportunity to share your story?

Yes or No

If yes, Please describe (when, where, how it contributed to the research process).

_____________________________________________________________________

_____________________________________________________________________

If no, What are some of the reasons why you have not had an opportunity to share your story?

_____________________________________________________________________

_____________________________________________________________________
For researchers: In the workshop, we talked about the importance of sharing stories and. In the past six months, have you had an opportunity to have a patient share their story with you or your research team?

Yes or No

If yes, please describe (when, where, how it contributed to the research process).

_____________________________________________________________________

If no, what are some of the reasons why not?

_____________________________________________________________________

Ongoing Learning Needs

5. After the workshop, we asked you to identify any future learning needs you might have. In the past six months, have you engaged in other learning opportunities related to POR?

Yes or No

If yes, What learning opportunities have you had?

_____________________________________________________________________

If no, What are some of the reasons you have not engaged in other learning opportunities?

_____________________________________________________________________

6. What other learning needs do you have related to patient-oriented research?

_____________________________________________________________________

Other Comments

7. Is there anything else you would like to share about the workshop or your experiences to date with patient-oriented research?

_____________________________________________________________________

Your insights are valuable for helping us understand how we can better support putting learning into action. Thank you for your feedback!
Facilitator Feedback Survey
The recommended timeframe for completing this survey is no more than one week after the session.

### Facilitator Feedback

As part of the pilot testing of the Module 1: Patient-Oriented Research session we are looking for feedback from the session facilitators. Please take a few moments to share some insights from your recent session.

1. Please rate your agreement with the following statements:

   **The workshop materials were well-prepared.**
   - Strongly Agree - Agree - Disagree - Strongly Disagree

   **The facilitation guide provided the information I needed to deliver the session.**
   - Strongly Agree - Agree - Disagree - Strongly Disagree

   **The pace of the workshop was appropriate.**
   - Strongly Agree - Agree - Disagree - Strongly Disagree

   **The session seemed to flow well.**
   - Strongly Agree - Agree - Disagree - Strongly Disagree

2. Were there any concepts or activities that participants seemed to struggle with during the session? If so, please describe.

   ________________________________________________________________

   ________________________________________________________________

   ________________________________________________________________

3. Overall, what do you think is working well with the workshop?

   ________________________________________________________________

   ________________________________________________________________

   ________________________________________________________________

4. What areas for improvement have you identified?

   ________________________________________________________________

   ________________________________________________________________

   ________________________________________________________________

5. Is there anything more you would like to share about your session?

   ________________________________________________________________

   ________________________________________________________________

   ________________________________________________________________

*Thank you for your feedback!*

Please watch your email – we will also be sending out an online survey to gather additional reflections and comments on today’s session.

Post-Workshop Survey
The recommended timeframe for participants to complete this survey is one week after the workshop.

Thank you for participating in Fundamentals of Health Research in Canada last week. As part of our ongoing improvement efforts, we would appreciate if you could take a few moments to provide some feedback on the session. Your responses are anonymous and will be used only for the purpose of session improvements.

Workshop Sections
1. During the workshop, we covered several sections of content. Please rate each of the workshop sections.

   The why of health research. Included looking at the purpose of health research and how it benefits our health system.

   Excellent - Good - Adequate - Poor - Very Poor

   The who of health research. Included looking at all the people who might be involved in health research (i.e., professors, patients, government) and how that research is funded (such as role of the Canadian Institute for Health Research or CIHR).

   Excellent - Good - Adequate - Poor - Very Poor

   The what of health research. Included looking research categories, research design or methodology, and what makes a good research question.

   Excellent - Good - Adequate - Poor - Very Poor

   The how of health research. Included the stages of research, peer review, and ethics.

   Excellent - Good - Adequate - Poor - Very Poor

Workshop Format and Delivery

Learn about effective decision-making models/processes for partnership.

**Learning Activity – Types of Decisions**
- Participants discuss own experiences with decision making approaches.

**Fast Feedback Form**
- Participants to rate agreement with statement (strongly agree to strongly disagree)
- “I can describe effective decision-making processes”

**Post-Workshop Survey**
- See above

**Follow Up Survey**
- Participant agreement with guiding principles (yes, always to no, never)
- “In the teams that I have been involved with, we have used effective decision making models to guide our work”

---

**D. Building partnerships**

Frame and plan team actions with the CEPPP’s 6-stages co-building model.

**Learning Activity – Discussion on Partnership (Slide 7)**
- Participants discuss definitions of the term partnership.

**Learning Activity – CEPPP Model Questions**
- Teams work together to answer questions based on the CEPPP model.

**Fast Feedback Form**
- Participants to rate agreement with statement

**Post-Workshop Survey**
- See above

**Follow Up Survey**
- Participant agreement with defining role (yes, always to no, never)
- “In the teams that I have been involved with, we have been applying the CEPPP model to co-build our team”

**Evaluation Tools**

**Fast Feedback Form [paper-copy only]**
Distribute this form at the end of the Module 3 session and collect before participants leave.

---

**Fast Feedback!**
Please take a few moments to provide some quick feedback on today’s session.

**In the session today, what perspective were you bringing?** (circle one)

- Patient – Researcher – Health care professional – Health system policy/decision-maker – Other

**How did we do in meeting today’s learning objectives? Please select one response for each objective.**

1. After today’s session:
   - I can explain the stages of team development.
     - Strongly Agree – Agree – Disagree – Strongly Disagree

   - I can identify strategies for working through each of these stages.
     - Strongly Agree – Agree – Disagree – Strongly Disagree

   - I recognize the different roles that team members can play and their importance.
     - Strongly Agree – Agree – Disagree – Strongly Disagree

   - I’ve identified the roles that suit me and those that don’t.
     - Strongly Agree – Agree – Disagree – Strongly Disagree

   - I know what it takes to ensure team members feel comfortable to contribute ideas.
     - Strongly Agree – Agree – Disagree – Strongly Disagree

   - I can see how leadership within a team can be shared according to each members’ expertise.
     - Strongly Agree – Agree – Disagree – Strongly Disagree
I can recognize when a team is vulnerable and might fall apart.

Strongly Agree – Agree – Disagree – Strongly Disagree

I can describe the team member behaviours that can threaten team development.

Strongly Agree – Agree – Disagree – Strongly Disagree

I understand how the guiding principles for patient-oriented research can be put into action.

Strongly Agree – Agree – Disagree – Strongly Disagree

I can describe effective decision-making processes.

Strongly Agree – Agree – Disagree – Strongly Disagree

I can apply the CEPPP model to co-building our team.

Strongly Agree – Agree – Disagree – Strongly Disagree

2. What did you find most valuable or helpful about this session?

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

3. How could this session be improved?

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

Thank you for your feedback!

Please watch your email – we will also be sending out an online survey to gather additional reflections and comments on today’s session.
Post-Workshop Survey
The recommended timeframe for participants to complete this survey is one week after the workshop.

Thank you for participating in the Module 3: Building Partnerships and Consolidating Teams Workshop last week. As part of our ongoing improvement efforts, we would appreciate if you could take a few moments to provide some feedback on the session. Your responses are anonymous and will be used only for the purpose of session improvements.

Workshop Sections
1. During the workshop, we covered several sections of content. Please rate each of the workshop sections.

   **Learning to do research as a team.** Looked at guiding principles for patient-oriented research.
   
   Excellent - Good - Adequate - Poor - Very Poor

   **Approaches and tools for stages of team development.** Included looking at stages of team development and strategies for working through the stages. Also looked at effective decision-making.
   
   Excellent - Good - Adequate - Poor - Very Poor

   **Building partnerships.** Included learning about the CEPP model and applying it to team.
   
   Excellent - Good - Adequate - Poor - Very Poor

Workshop Format and Delivery
2. Please rate your agreement with the following statements.

   **The workshop materials were well-prepared.**
   
   Strongly Agree - Agree - Disagree - Strongly Disagree

   **The pace of the workshop was appropriate.**
   
   Strongly Agree - Agree - Disagree - Strongly Disagree

   **The workshop activities were valuable.**
   
   Strongly Agree - Agree - Disagree - Strongly Disagree

   **The workshop facilitation was effective.**
   
   Strongly Agree - Agree - Disagree - Strongly Disagree

   **As a result of the workshop, I have a better understanding of effective team work in health research.**
   
   Strongly Agree - Agree - Disagree - Strongly Disagree
3. Did you attend this workshop with your research team?

   Yes or No

   If no, what were the reasons why you did not attend as a team?
   ____________________________________________________________
   ____________________________________________________________
   ____________________________________________________________

4. This module is Module 3 in a series. Please indicate which modules you have completed and in which order.
   - Module 1 (first – second – third – have not yet taken)
   - Module 2 (first – second – third – have not yet taken)
   - Module 3 (first – second – third – have not yet taken)

5. This module was delivered as an in-person workshop. Would you have preferred to learn this content in a different way?

   Yes or No

   If yes, what other method(s) would you have preferred? (for example, by webinar, online module, etc.)
   ____________________________________________________________
   ____________________________________________________________

6. What will you remember most about the session?
   ____________________________________________________________
   ____________________________________________________________
   ____________________________________________________________

7. What improvements would you suggest?
   ____________________________________________________________
   ____________________________________________________________
   ____________________________________________________________

   Other Feedback
8. Please share any other comments you have about the workshop.
   ____________________________________________________________
   ____________________________________________________________
   ____________________________________________________________
   ____________________________________________________________

   Thank you for your feedback!
Follow-Up Survey
Time-frame for follow-up survey is recommended six months after session.

In the past six months, you participated in the Module 3: Building Partnerships and Consolidating Teams Workshop. One of the goals of the workshop is to build capacity for effective teamwork. Please take a few moments to provide feedback on your experience as a team member in a patient-oriented research project.

1. Have you been involved as part of a team on a health care research project?
   
   **Yes** or **No**

   If no, what were some of the reasons for not being involved and/or barriers to being part of a team?
   
   __________________________________________________________
   __________________________________________________________
   __________________________________________________________

Learning to do Research as a Team

2. During the workshop, we looked doing research as a team. In thinking of your experiences in health research during the last six months, please select the most appropriate response for the following statement.

   *In the teams that I have been involved with, I feel that the guiding principles are being put into action.*

   Always - Usually - Sometimes - Rarely - Never

3. Is there anything you would like to share about your experiences with team research?
   
   __________________________________________________________
   __________________________________________________________
   __________________________________________________________

Approaches and Tools for Effective Teams

4. During the workshop, we looked at approaches and tools for effective teamwork. In thinking of your experiences in health research during the last six months, please select the most appropriate response for the following statements.

   *In the teams that I have been involved with, we have been able to recognize and work through the stages of team development.*

   Always - Usually - Sometimes - Rarely - Never

   *In the teams that I have been involved with, we have used effective decision making models to guide our work.*

   Always - Usually - Sometimes - Rarely - Never
In the teams that I have been involved with, I am confident that I was able to act appropriately to support team development.

Always - Usually - Sometimes - Rarely - Never

In the teams that I have been involved with, I was able to identify the behaviors by other team members that threatened our team.

Always - Usually - Sometimes - Rarely - Never

5. Is there anything you would like to share about the effectiveness of your team experience?
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

Building Partnerships

6. During the workshop, we looked at using the CEPPP approach for co-building the team. In thinking of your experiences in health research during the last six months, please select the most appropriate response for the following statement.

In the teams that I have been involved with, we have used the CEPPP model to co-build our team.

Always - Usually - Sometimes - Rarely - Never

7. Is there anything you would like to share about building the team?
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

Other Comments

8. Is there anything else you would like to share about the workshop or your experiences to date with patient-oriented research?
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

Your insights are valuable for helping us understand how we can better support putting learning into action. Thank you for your feedback!
Facilitator Feedback Survey
The recommended timeframe for completing this survey is no more than one week after the session.

**Facilitator Feedback**

As part of the pilot testing of the *Module 3: Building Partnerships and Consolidating Teams* session we are looking for feedback from the session facilitators. Please take a few moments to share some insights from your recent session.

1. Please rate your agreement with the following statements:
   - The workshop materials were well-prepared.
   - The facilitation guide provided the information I needed to deliver the session.
   - The pace of the workshop was appropriate.
   - The session seemed to flow well.

<table>
<thead>
<tr>
<th>Strongly Agree</th>
<th>Agree</th>
<th>Disagree</th>
<th>Strongly Disagree</th>
</tr>
</thead>
</table>

2. Were there any concepts or activities that participants seemed to struggle with during the session? If so, please describe.

   ______________________________________________________
   ______________________________________________________
   ______________________________________________________

3. Overall, what do you think is working well with the workshop?

   ______________________________________________________
   ______________________________________________________
   ______________________________________________________

4. What areas for improvement have you identified?

   ______________________________________________________
   ______________________________________________________
   ______________________________________________________

5. Is there anything more you would like to share about your session?

   ______________________________________________________
   ______________________________________________________

Thank you for your feedback!
