Effects of Selective Serotonin Reuptake Inhibitors on Platelet Function
Mechanisms, Clinical Outcomes and Implications for Use in Elderly Patients

de Abajo FJ

Supplemental Digital Content

This Supplemental Digital Content contains the classification list referred to in the full version of this article, which can be found at http://adisonline.com/aging.
High inhibition ($K_D < 1 \text{ nM}$)
Paroxetine
Clomipramine
Sertraline
Fluoxetine

Medium inhibition ($1 < K_D < 10 \text{ nM}$)
Citalopram
Imipramine
Fluvoxamine
Amitriptyline
Venlafaxine

Low inhibition ($10 < K_D < 100 \text{ nM}$)
Desipramine
Nortriptyline
Protriptyline
Amoxapine
Doxepin

Very low inhibition ($K_D > 100 \text{ nM}$)
Trimipramine
Trazodone
Nefazodone
Maprotiline
Bupropion
Tranylcyromine
Mirtazapine
Phenelzine
