

Reviewer's report

Title: Younger Age of Escalation of Cardiovascular Risk Factors in Asian Indian Subjects

Version: 2 Date: 14 May 2009

Reviewer: Ashan Gunarathne

Reviewer's report:

The authors have been able to address the majority of the issues raised in the previous version, in particular sections related to study methodology/limitation and study hypotheses. However there is space for some improvement (Introduction/ discussion : too verbose , Quality of the figures/tables etc..).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
