

## **Reviewer's report**

**Title:** What are the roles involved in establishing and maintaining informational continuity of care within family practice? A systematic review

**Version:** 1 **Date:** 25 June 2008

**Reviewer:** Gwen van Servellen

### **Reviewer's report:**

The review of literature is redundant .....is covered in many other articles. I would suggest that it be summarized and not detailed here. The use of the theories chosen do not apply to all populations and I think that it is wise to suggest for what populations this process and the theories are most appropriate.
