

Reviewer's report

Title: Prospective study of urinary tract infection surveillance after kidney transplantation

Version: 4 **Date:** 1 March 2010

Reviewer: Daniela Corona

Reviewer's report:

The authors present an interesting series of urinary tract infections in a group of American Latin kidney transplant recipients, suggesting a long surveillance to prevent graft failure and emergence of antibiotic resistance

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
