

## **Reviewer's report**

**Title:** Impairment of intellectual functions after surgery and posterior fossa irradiation in children with ependymoma is related to age and neurologic complications

**Version:** 3 **Date:** 3 December 2007

**Reviewer:** Cornelia.E Catsman-Berrevoets

### **Reviewer's report:**

the authors nicely reorganized the paper and answered to my comments sufficiently. It is well written and important to the field. Therefore I recommend publication.
