

Reviewer's report

Title:Outcomes of polytrauma patients with Diabetes Mellitus

Version:1**Date:**2 January 2014

Reviewer:Pol Maria Rommens

Reviewer's report:

I have to congratulate the authors for this important work. It will certainly influence - hopefully ameliorate - the mangement of diabetic patients with a severe injury. The number of patients, the prospective collection of data and the analysis of the results are convincing. Also is the discussion well-structured and logical. I therefore recommend to accept the manuscript as it is.

Quality of written English:Acceptable

Statistical review:Yes, but I do not feel adequately qualified to assess the statistics.
