

Reviewer's report

Title:Brace Modifications that can Result in Improved Curve Correction in Idiopathic Scoliosis

Version:1**Date:**5 February 2014

Reviewer:Patrick Knott

Reviewer's report:

This article is much improved over the last version. The focus on the teaching points of a single case study will be useful to the audience now.

Major Compulsory Revisions: None

Minor Essential Revisions: None

Discretionary Revisions: Comment- This is still a single case study, which will not have the same overall value as a series or a research study with significant data analysis.

Level of interest:An article whose findings are important to those with closely related research interests

Quality of written English:Acceptable

Declaration of competing interests:

No competing interests.
