Reviewer's report

Title: Ulcerated calcification of the interventricular septum causing Transient Ischemic Attacks: Case Report

Version: 1 Date: 10 April 2007

Reviewer: Panagiotis Dedeilias

Reviewer's report:

General

-----------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
The case is well presented and is worth of publication. There is only a very little literature regarding this subject. I suggest that the discussion and the conclusion can be a little more extensive.

-----------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable
