Reviewer's report

Title: Extramedullary multiple myeloma presenting with an atrial mass: a case report and a review of the literature

Version: 2 Date: 8 March 2012

Reviewer: Mario Camarda

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

I had a positive opinion of the manuscript. Though some other similar works are reported in literature, the authors describe a very interesting situation due to peculiar remarks and unusual vessels aggressiveness of the disease. Even the specified therapeutic aspects are worth considering. I guess a little revaluation of quality of written English should be considered. Thanks.

Quality of written English: Needs some language corrections before being published
