Reviewer's report

Title: Unmet healthcare needs of elderly people in Korea

Version: 2 Date: 03 Apr 2018

Reviewer's report:

In my opinion, after this review the paper is suitable for publication. Thank for the changes you have made.

I just have one remark: I would like to ask the authors to explain what they mean by chronic diseases. Could you maybe cite which diseases were in the list of the survey? The percentage of older people with at least one chronic disease in the study is high (94%) and they mention that the percentage from a French study was 98%. In other statistics (e.g. National Council of Aging - USA- 2016) the prevalence is 80%. It would be good to inform the reader what the authors meant by 'chronic disease'.
