

## **Reviewer's report**

**Title:** Dental anomalies: prevalence and associations between them in a large sample of non-orthodontic subjects. A cross-sectional study

**Version: 1 Date:** 23 Dec 2016

**Reviewer:** Edward Lo

### **Reviewer's report:**

This is a revised version of the manuscript and the authors have addressed my major concerns.

I only have the followings suggestions for enhancing the manuscript:

1. Conclusion - the first bullet point can be deleted
2. Table 3 - the values in the upper right and lower left parts (separated by the diagonal) are duplicated. One set of them can be deleted for clarity purpose.
3. Another thorough read through to enhance the English language

### **Are the methods appropriate and well described?**

If not, please specify what is required in your comments to the authors.

Yes

### **Does the work include the necessary controls?**

If not, please specify which controls are required in your comments to the authors.

Unable to assess

### **Are the conclusions drawn adequately supported by the data shown?**

If not, please explain in your comments to the authors.

Yes

### **Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?**

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

### **Quality of written English**

Please indicate the quality of language in the manuscript:
