Reviewer's report

Title: Endotracheal intubation with Airtraq(R) versus Storz(R) videolaryngoscope in children younger than two years - a randomized pilot-study

Version: 1 Date: 13 January 2012

Reviewer: Thomas Engelhardt

Reviewer's report:

discretionary revisions:
This is a simple pilot study to gather baseline data of 2 new laryngoscopes.
The manuscript appears sound with a simple methodology.
It should perhaps be made clear what endpoints are the investigators attempting to compare in the proposed larger trial.
The authors should not try and make conclusions/ recommendations in the discussion of which is better.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
