Reviewer's report

Title: Lumbar puncture-related cerebrospinal fluid leakage on magnetic resonance myelography: Is it a clinically significant finding?

Version: 1 Date: 21 March 2013

Reviewer: oktay ALGIN

Reviewer's report:

Major Compulsory Revisions:

• Well Main Shortcomings of the article are Small study group and inadequate discussion.
• Please update the references. For example, add the references (given below) about the gadolinium-enhanced MR myelography (cisternography), intracranial hypotension, and limitation of CT myelography. Please discuss these papers and topics briefly. For example, MR myelography is less traumatic than CT myelography (Algin O, AJNR).

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
