Reviewer's report

Title: Intubating conditions and side effects of propofol, remifentanil and sevoflurane compared with propofol, remifentanil and rocuronium: a randomised, prospective, clinical trial

Version: 2
Date: 6 March 2014

Reviewer: Hendrikus Lemmens

Reviewer's report:

Major Compulsory Revisions
It seems extubation criteria are not defined or standardized. Please indicate in the manuscript why you scored extubation criteria.

Please explain how you analyzed the 2 patients that needed muscle relaxation for tracheal intubation.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
