Reviewer’s report

**Title:** Effects of low-flow sevoflurane anesthesia on renal function in low birth weight infants

**Version:** 3  **Date:** 21 July 2014

**Reviewer:** Azize BESTAS

**Reviewer’s report:**

1. Have benefits and risks of the research been estimated before starting work?
2. What did the authors have taken measures against the risk of investigation?
3. There is no control group in this study. Therefore, changes in laboratory values cannot be attributed only to sevoflurane administration.
4. All techniques and applications should be presented in more detail.
5. Article should be written in scientific writing rules from beginning to end. The discussion section should be written in a more appropriate and understandable manner.

**Level of interest:** An article of limited interest

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I have not received any reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this paper, either now or in the future.

I declare that I do not have any competing interest and conflict of interest.
