Reviewer's report

Title: Anesthesiologists' practice patterns for treatment of postoperative nausea and vomiting in the ambulatory PACU

Version: 2 Date: 19 May 2006

Reviewer: Ashraf Habib

Reviewer's report:

General

The authors did a good job in revising the manuscript. It provides useful and interesting information.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Page 6, physician sample paragraph, last line: add "included" after "was".

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

Page 12, fourth paragraph, second sentence: the comment about pre-printed PACU orders is already mentioned in the last paragraph of page 11. It might be better to combine both sections.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
