Reviewer's report

Title: The impact of administration of tranexamic acid in reducing the use of red blood cells and other blood products in cardiac surgery.

Version: 3 Date: 25 July 2006

Reviewer: Valter Casati

Reviewer's report:

General
The authors have performed a careful revision of their paper, significantly improving it following almost all the indications of the reviewers.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
