Reviewer's report

Title: Efficacy and safety of a two-step method of skin preparation for peripheral intravenous catheter insertion - a prospective multi-centre randomised trial

Version: 2 Date: 18 December 2006
Reviewer: Nigel Hall

Reviewer's report:

General
This manuscript has been satisfactorily improved since first submission

-----------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-----------------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
