Reviewer’s report

Title: Noninvasive Cardiac Output and Blood Pressure Monitoring cannot replace an Invasive Monitoring System in Critically Ill Patients

Version: 2 Date: 25 August 2009

Reviewer: David G Whalley

Reviewer’s report:

Major Compulsory Revisions: None
Minor Essential Revisions: 
- There is still the occasional lapse in spelling and/or grammar. For example, the 5th sentence in the abstract should start with the definite article "The.....". I know that "legitimate" can be used as a verb (page 8, 2nd line), but it is more usual to use the word "justify" in that context. Minor stuff, I realize, but the authors might want to correct the grammar or preferably give it to an English major/teacher for their advise.

Discretionary Revisions: None

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
