Reviewer’s report

Title: Cor Triatriatum Sinister diagnosed in adult life with three dimensional transesophageal echocardiography

Version: 1 Date: 23 August 2010

Reviewer: Nikolaos Tzemos

Reviewer’s report:

Minor Essential Revisions

The authors should report the incidence of this congenital defect (0.2-0.4%)

There is typo page 2, paragraph 5, line 1: cavo tricuspid should read cavo-tricuspid.

Also, figure 2 could be subsisted with a TTE parasternal long axis showing the dilated coronary sinus which provide some clues as to whether this is roofed or unroofed

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
