Reviewer’s report

Title: Double auricles of the right atrium: a unique anatomic deformity

Version: 2 Date: 7 March 2011

Reviewer: Rainer G.H. Moosdorf

Reviewer’s report:

The revisions have been made as far as possible. The anatomical variation may be unique but is still of limited interest for the special cardiovascular community. I would just recommend the publication as a short communication.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
