Reviewer’s report

Title: Personality and time delay to treatment of acute myocardial infarction.

Version: 2 Date: 27 November 2010

Reviewer: Cheuk-Kit Wong

Reviewer’s report:

The authors did not really separately analyze the STEMI gp from non-STEMI gp but in their table 2, the proportion of STEMI was similar in all quartiles of time to presentation.

Theoretically a proper sub-gp analysis on STEMI should be done but this is likely to show similar result to the overall cohort.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
