Reviewer's report

Title: HYPEST study: Epidemiology of hypertensive patients of Estonia

Version: 1 Date: 3 June 2011

Reviewer: Andrzej Leon Pawlak

Reviewer's report:

The message of the paper is clear and specific.
I would, however, avoid calling it epidemiology. The title could run, for example, “Sex specific curriculum of hypertension in Estonia”.
The last sentence of Abstracts Results should be more self explaining, eg. The lower age of hypertension onset correlated with the lower incidence of smoking (p=…
Otherwise the reporting is acceptable

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
