Reviewer’s report

Title: Atrioventricular block of intraoperative device closure perimembranous ventricular septal defects; a serious complication

Version: 2 Date: 23 February 2012

Reviewer: Quansheng Xingqs

Reviewer’s report:

We will not change our comments on this manuscript after reading the authors' response to reviews and their revised manuscript. All the risk factors for cAVB from intraoperative device closure VSD that the authors discussed in their manuscript and response to reviews had been discussed in a published article[1].

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
