Reviewer's report

Title: Patient perspective on the management of atrial fibrillation in five European countries

Version: 2 Date: 21 October 2013

Reviewer: Carl J Lombard

Reviewer's report:

The response frequencies for outcomes are indicated by \[n=xxx\]. This practice should be clearly described in the methods together with the comment that the denominator was the number of interviews done in each country. One assumes that there were no missing values or non-response for any of the reported outcome.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
