Reviewer's report

Title: Cardiovascular Fitness Predicts Cognitive Performance in Heart Failure Patients Enrolled in Cardiac Rehabilitation

Version: 2 Date: 25 March 2013

Reviewer: Jenna Scisco

Reviewer's report:

Thank you to the authors for fully addressing all of my comments. The paper is much improved. I have two very minor essential revisions to request:

P. 4: The sentence "Second, to examine the validity of office-based estimates of fitness by correlating them to performance on stress testing." is an incomplete sentence. Please correct this.

P. 6: The acronyms "FAB" and "SCWT" are not defined. Please add (FAB) and (SWCT) after their full name description in the first sentence of the "executive function" section.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
