Reviewer's report

Title: Risk factors among people surviving out-of-hospital cardiac arrest and their thoughts about what lifestyle means to them: A mixed methods study

Version: 2 Date: 2 August 2013

Reviewer: Veronika Reinhard

Reviewer's report:

The article is interensting to read and gives useful information about quality of life after OHCA. It points out the possibilities, how to change life-style and thinking of patients with cardiovascular disease.

The revised manuscript is much more clearer and well understandable.

Authors have gone through all points the reviewers have showed and the explanations are acceptable.

I do not have any major compulsory, minor essential or discretionary revision recommendations.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no financial or non-financial competing interests.
