Reviewer’s report

Title: Ethnic differences in the occurrence of acute coronary syndrome: results of the Malaysian National Cardiovascular Disease (NCVD) Database Registry (March 2006- February 2010)

Version: 2 Date: 18 September 2013

Reviewer: Tarek Kashour

Reviewer’s report:

The authors made a significant effort to improve the manuscript. Major revisions were made as suggested.

One thing needs to be modified in the results section regarding fibrinolysis. I recommend to the authors to stress in the text the fact that door to needle time is very long and the proportion of patients receiving fibrinolysis within 30 minutes is very low.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
