Reviewer's report

Title: Differential association between metabolic syndrome and coronary artery disease evaluated with cardiac computed tomography according to the presence of diabetes in a symptomatic Korean population

Version: 6 Date: 13 July 2014

Reviewer: Thomas B Christophersen

Reviewer's report:

I have reviewed the paper, including my previous comments, and the Authors responses and have found no further points of unclarity. I thank the Authors for a well-witten paper on an interesting and important subject in an ever increasing population at risk, as well as a balanced response to the previous review. I find the revisions in the manuscript to be well considered and have no further comments for this paper.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
