Reviewer's report

Title: Prevalence and risk factors of abnormal left ventricular geometrical patterns in untreated hypertensive patients

Version: 2 Date: 10 July 2014

Reviewer: Brian Rayner

Reviewer's report:

Major compulsory revision - nil

Minor revisions - it would be very nice if there was some quantification of alcohol consumption.
I think the risk factors for LVH in the results section could be simplified by referring the relevant table

The paper is well written with good English.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
