Reviewer’s report

Title: Nemanline Myopathy and Heart Failure: Role of Ivabradine. A Case Report

Version: 2 Date: 22 October 2014

Reviewer: Hisashi Kawashima

Reviewer’s report:

Major: This manuscript is written about a case who had IVABRADINE recovered dramatically. The case is interesting and worthwhile to publish to decide beta-blocker. However there are a few case and very preliminary, since the diagnosis is limited. And also the course is short. No biopsy of heart is done.

Minor: The authors should add similar report of the effectibeness in neuromusculare diseases in discussion. The authors should add the figure of nemaline body.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

None of all questions.
