Reviewer's report

Title: Systematic study of the effects of lowering low-density lipoprotein-cholesterol on regression of coronary atherosclerotic plaques using intravascular ultrasound in Western and Asian

Version: 3 Date: 6 October 2014

Reviewer: Salma Esmaeil

Reviewer's report:

First of all, thanks alot for the authors for this interesting article, LDL-C lowering is essential in treating coronary artery diseases
This is a great work, but just a major comment the statistics is very complicated in writing, it should be made simlper

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
