Reviewer's report

Title: Acute myocardial infarction after amoxycillin - induced anaphylactic shock in a young adult with normal coronary arteries: a case report and review of literature

Version: 2 Date: 9 September 2004

Reviewer: Gianni Marone

Reviewer's report:

The paper is significantly improved although I believe there are a number of points that the authors should address before the paper can be accepted for publication.

Below are my suggestions to the authors:

1. I suggest the authors remove "and review of literature" from the title.
2. Page 6, paragraph 2, line 1. "effector organ" should read "site of".
3. Page 6, paragraph 2, line 5. "muscle" should read "mast"
4. Page 6, paragraph 2, line -7. "peptide leukotriene" should read "cysteinyl leukotrienes"
5. Page 8, paragraph 3, last line. Add reference 15, 16 and 17.
6. Reference 17. "Austeen" should read "Austen".

If the authors make these changes, it is my opinion that the paper can be accepted for publication.
