Reviewer's report

Title: Circadian analysis of myocardial infarction incidence in an Argentine and Uruguayan population

Version: 1 Date: 12 September 2005

Reviewer: Gregory Lip

Reviewer's report:

This is a nice study which I enjoyed reading. I suggest more detail should be provided on the study population patient comorbidities and concomitant drug therapies in a separate table – whilst this may have been stated in their main paper, the present substudy would benefit from a better description of the study population. The limitations are well discussed.
