Reviewer's report

Title: ALK1 signalling analysis identifies angiogenesis related genes and reveals disparity between TGF-β and constitutively active receptor induced gene expression

Version: 2 Date: 5 March 2006

Reviewer: Marie-Jose Goumans

Reviewer's report:

General

To my opinion, the authors have answered the questions adequately and the manuscript has improved tremendously

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
