Reviewer's report

Title: Percutaneous septal ablation for left mid-ventricular obstructive hypertrophic cardiomyopathy: a case report

Version: 3 Date: 4 July 2005

Reviewer: Pawel Petkow Dimitrow

Reviewer's report:

General
1. Please, provide complete invasive pressure measurements at rest conditions after ablation (similar to data before intervention i.e. LV apex, LV outflow tract and aortic pressures).
2. The area of echocontrast deposit is not clearly visualised in figure 2A.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No
