Reviewer's report

Title: Under-treatment and under diagnosis of hypertension: A serious problem in the United Arab Emirates

Version: 2 Date: 22 March 2006

Reviewer: Gregory Lip

Reviewer's report:

this is a simple 'one liner' which shows that UAE is no different to the rest of the world in terms of hypertension (mis)management.

the manuscript is well written, and analyses appropriate. One point worth emphasising more is the high % of expats in UAE, and how this reflects on the data, esp since new migrants may have less well detected and controlled hypertension,
