Reviewer's report

Title: Evaluation of CXCL9 and CXCL10 as circulating biomarkers of human cardiac allograft rejection.

Version: 2 Date: 16 May 2006

Reviewer: Marja Steenman

Reviewer's report:

General

-----------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The authors state in their response that for cluster 3 no genes were omitted based on absent/present call classification. This information should be added to the manuscript.

-----------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No
