Reviewer's report

Title: Measurement of Coronary Calcium Scores or Exercise Testing as Initial Screening Tool in Asymptomatic Subjects at Risk for Coronary Artery Disease: an Evaluation Study

Version: 1 Date: 24 January 2007

Reviewer: Roger S. Blumenthal

Reviewer's report:

General
Shorten the long paragraphs

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
Comment more on the persons with CAC of 100-300.
Emphasize the need to forgo PCI if there is not a large amount of inducible ischemia.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
