Reviewer’s report

Title: Are Coronary Event Rates Declining Slower in Women Than in Men? - Evidence From Two Population-Based Myocardial Infarction Registers in Finland

Version: 3 Date: 8 October 2007

Reviewer: Christa Meisinger

Reviewer's report:

General
The paper has been substantially improved. All the major and minor revisions have been addressed. I have no further comments.

----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

----------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

----------------------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
