Reviewer’s report

Title: A compare between myocardial topical negative pressure levels of -25 and -50 mmHg in a porcine model

Version: 4 Date: 22 April 2008

Reviewer: Douglas Curran-Everett

Reviewer’s report:

Minor Essential Revisions

1. The authors must include a description of their experimental design in the manuscript. As the manuscript now stands, it is not at all clear that they balanced the order of negative pressures.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
