Reviewer's report

Title: Ankle Blood Pressure as a Predictor of Total and Cardiovascular Mortality

Version: 2 Date: 17 December 2007

Reviewer: Jackie F Price

Reviewer's report:

The authors have satisfactorily addressed my previous comments. As they point out, one key finding is that 'even among persons with normal ABI the ankle blood pressure can help to identify those....at elevated risk of all-cause and cardiovascular death' and it would be good to see this statement in the abstract.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
